

Eastern PA Rapid Re-Housing Mini-Series

Session 4 Using Data in RRH

Technical Assistance Collaborative (TAC)

2022

RRH Mini Series

Session 1 - Rapid Re-Housing and Its Core Components February 25, 1:30 – 3:30

Session 2 : RRH Deep Dive

March 22, 1:30 – 3:30

Session 3: Centering Equity in RRH

April 19, 1:30 – 3:30

Session 4: Using Data in RRH

May 17, 1:30 – 3:30

Session 5: Putting it all Together

June 21, 1:30 – 3:30

- For today's session, please try to join on a computer to get the most out of the interactive portions.
- Please join us on camera. We have points along the way for peer discussion.
- Don't be shy! Please ask questions and participate.
- Please keep yourself on mute unless talking to minimize background noise.

Zoom Controls on Zoom Panel

Typically on the bottom of the screen

- Mute and Stop Video gives you control of sound and picture
- Participants see your peers on the call
- Chat ask question talk with your peers
- Reactions emojis to respond to questions

Welcome from DMA

- **1.** Welcome & Grounding
- **2.** Introductions
- **3.** Homeless Data
- **4.** Homeless Management Information System
- **5.** Data Standards and their Uses in RRH
- 6. Reporting
- 7. Questions

POLL QUESTION

What best describes your involvement in Data in Your CoC?

- Spectator (brand new)
- Rookie/Newbie (a little bit of exposure)
- All-star (some familiarity)
- Veteran (very knowledgeable)
- Coach (you can facilitate racial equity workshops and teach other people)

Welcome Back

Welcome Back

Let's get to know each other!

- Introduce yourself using the chat:
 - 🖉 Name
 - 🖉 Organization
 - 🖉 Role
 - Check in question: what time of day are you most productive

Homeless Data

Refers to the consideration, through an equity lens, of the ways in which data is collected, analyzed, interpreted, and distributed

It underscores marginalized communities' unequal opportunities to access data and, at times, their harm from data's misuse

- We must interrogate who selects data points!
- Who collects data?
- How might our implicit biases impact how we collect and use data?
- What might we be missing?

STAGES OF HOMELESSNESS

- HUD uses standard household types to evaluate effectiveness of programs.
 - Adult Only (AO)
 - Adults With Children (AC)
 - Children Only (CO)
- Additional evaluation of projects can including but not limited too
 - Race
 - Age
 - Gender
 - Gender identity
 - Ethnicity
 - Youth

Additional data sources not required by HUD can provide context for what quantitative is trying to tell us.

Data can be deceiving if reported incorrectly

- Overuse of averages
- Use caution when weighing small numbers
- Use both Quantitative and Qualitative Analysis
 - Quantitative Data that can be counted, measure, and expressed using numbers
 - Qualitative Describing the quality of something in size, appearance, value, etc. Examples: Participant surveys, landlord surveys
- Remember that reports rarely tell the <u>whole</u> story.

- An analysis is limited if it only utilizes quantitative data
- Quantitative data can highlight performance and inequities, but qualitative data is needed to understand why we are seeing what we are seeing
- Qualitative data helps highlight the client experience of the system and programs
 - What do those who are most impacted say is needed to end their homelessness?
 - Does this differ by race/ethnicity/age/gender/gender identity/ability?

Pairing Quantitative Data with Qualitative Indicators

Housing Stability Measures: A collection of measures that track increases in housing stability of Black, Indigenous, Asian, Pacific Islander, and all people of color. Gender, gender identity, ability, age, etc.

- Was the individual/household connect to services and were those services culturally appropriate?
- Was the individual/household connected to mainstream benefits?
- Has the individual/household been connected to employment?
- Have you/anyone in the household been incarcerated since being housed?
- Have you/anyone in the household been hospitalized since being housed?

Experience Measures: A collection of measures centered around the self-reported experience of Black, Indigenous, Asian, Pacific Islander, and all people of color. Gender, gender identity, ability, age, etc.

- Overall satisfaction with experience
- Level of household well-being
- Level of co-collaboration in creation of housing plan
- Cultural alignment and appropriateness for individual/household
- The quality provision of housing related services

Length of Time for Homeless Placement

Homeless Management Information System (HMIS)

- A Homeless Management Information System (HMIS) is a local information technology system used to collect client-level data and data on the provision of housing and services to homeless individuals and families and persons at risk of homelessness.
- Each Continuum of Care (CoC) is responsible for selecting an HMIS software solution that complies with HUD's data collection, management, and reporting standards, establishing a Data Quality Plan and a Privacy and Security Plan
- The SNAPS Data Strategy provides a multi-year vision, as well as specific goals and objectives for HMIS.

- The SNAPS Strategy sets out three overarching goals for itself and communities:
- 1. Communities use their data to optimize systems of care through making ongoing system performance improvements and determining optimal resource allocation;
- 2. Communities operate data systems that allow for accurate, comprehensive, and timely data collection, usage and reporting; and
- 3. Federal government coordinates to receive and use data to make informed decisions in coordination with other data sets, across and within agencies.

- Continuums of Care Local policy makers, planners and advocates can use aggregated HMIS data to demonstrate the size and characteristics of the homeless population in their communities and improve their understanding of service usage patterns by that population
- Agencies Agencies can use HMIS to produce mandated reports, monitor effectiveness of specific projects, and assess staff productivity
- Projects An HMIS offers front-line program staff tools for providing more effective client services through improved referrals, case management, and service coordination.

- Victim service providers cannot input client-level information into the certified local HMIS system under the standard privacy and security settings.
- Victim service providers, instead, must enter client information into a separate Comparable Database, and provide aggregate data to the Continuum of Care (CoC)
- HUD defines a "victim service provider" as private nonprofit organization whose primary mission is to provide services to victims of domestic violence, dating violence, sexual sault, or stalking. Such term includes rape crisis centers, battered women's shelters, domestic violence transitional housing and programs, and other programs.

Data Standards and their Uses in RRH

Types of HMIS Data

- Project Level
- Participant Level
- Metadata
- Data Quality

SCIENCE TIP

You can distinguish an alligator from a crocodile by paying attention to whether the animal sees you later or in a while.

Universal Data Elements

- Name
- Social Security Number
- Date of Birth
- Race
- Ethnicity
- Gender
- Veteran Status
- Disabling Condition
- Project Start Date

- Project Exit Date
- Destination
- Relationship to Head of Household
- Client Location
- Housing Move-In Date
- Prior Living Situation

Household Composition

- Name
- Social Security Number
- Date of Birth
- Race
- Ethnicity
- Gender
- Veteran Status
- Disabling Condition
- Project Start Date

- Project Exit Date
- Destination
- Relationship to Head of Household
- Client Location
- Housing Move-In Date
- Prior Living Situation

- Name

0

0

.

Time Distribution of Days Homeless

Average cumulative days homeless and distribution by defined time intervals for each household type.

38

Returns to the Homeless System

Percent of households that returned to the homeless system within six months of exiting to a permanent destination. Results are shown for the exit cohort selected in the dropdown.

v

HH that Exited in the first 6 mo of the Current Report Period

~

Stella Household Types & Population Groups

All measures are available for these Household Types

- System Utilization History ~
 - First-time homeless
 - ✓ Returners
 - ✓ Moved into PSH

- Race and Ethnicity
 - White Non-Hispanic (HoH)
 - ✓ White Hispanic (HoH)
 - Asian-Pacific Islanders (HoH)
 - Any other race/ethnicity

> Allows for drill down by population groups within these Household Types

Analyze System Performance with Stella P

Household type or Population Group	Number of Households with Days Homeless	Average Days Homeless	Percent Exits to Permanent	Percent Exits to Unknown	Percent Returning within first six months
All Households					
e.g. Adult Only (AO)					
e.g. AO Veteran					
Adult and Child (AC)					
e.g. AO 18-24 YO					

Analyze System Performance with Stella P

Household type or Population Group	Number of Households with Days Homeless	Average Days Homeless	Percent Exits to Permanent	Percent Exits to Unknown	Percent Returning within first six months
All Households	3,600 HH	83 days	46%	23%	8%
e.g. Adult Only (AO)	2,578 HH	85 days	42%	27%	9%
e.g. AO Veteran	342 HH	101 days	56%	17%	8%
Adult and Child (AC)	863 HH	87 days	62%	10%	4%
e.g. AO 18-24 YO	354 HH	87 days	40%	25%	7%

Breakout Rooms

HUD System Performance Measures

- Required that each CoC submit these to HUD each year, using the HDX website
- Data must come from HMIS and is intended to reflect SYSTEM level performance (v. CoC Program-funded project performance)
- First submission occurred in 2015
- Measures are set in the HEARTH Act, and required via the CoC Program interim rule

SPM data allows us to understand if homelessness is.....

Non-recurring

System Performance Measures

- Measure 1: Length of Time Persons Remain Homeless
- Measure 2: The Extent to which Persons who Exit Homelessness to Permanent Housing Destinations Return to Homelessness
- Measure 3: Number of Homeless Persons
- Measure 4: Employment and Income Growth for Homeless Persons in CoC Program-funded Projects
- Measure 5: Number of Persons who Become Homeless for the First Time
- Measure 7: Successful Placement from Street Outreach and Successful Placement in or Retention of Permanent Housing
- Data Quality
 - HMIS Participation Rate from Housing Inventory Chart
 - Destination of Don't Know, Refused, or Missing

Annual Performance Report

- The APR & CAPER are due annually to the U.S. Department of Housing and Urban Development (HUD) within 90 days at the end of a recipient's operating year
- The purpose of both the APR & CAPER is to report to HUD on the yearly performance of the projects funded by the CoC & ESG Programs
- These reports are also useful for:
 - CoC and ESG recipients to measure project performance; and
 - Continuums and Collaborative Applicants to measure project performance and identify the impact of projects on overall system performance

Question 22c

Permanent Housing projects can view how long it takes to move clients into housing units with.

This measures the time between Project Start and the Housing Move-

	Total	Without Children	With Children and Adults	With Only Children	Unknown Household Type
7 days or less	74	21	53	0	0
8 to 14 days	29	9	20	0	0
15 to 21 days	16	3	13	0	0
22 to 30 days	6	2	4	0	0
31 to 60 days	14	6	8	0	0
61 to 180 days	3	3	0	0	0
181 to 365 days	0	0	0	0	0
366 to 730 Days (1-2 Yrs)	0	0	0	0	0
Total (persons moved into housing)	142	44	98	0	0
Average length of time to housing	12	17	10	0	0
Persons who were exited without move-in	88	12	76	0	0
Total	230	56	174	0	0

**Special Note:* The Average length of time to housing is only for move-in dates within the report dates.

Breakout Rooms

Questions?

What one word describes how you are leaving the space today?

APR/CAPER Reports Key Terms

- Chronically homeless individual a person who is homeless, is disabled, and has been homeless for at least one year or has had at least four separate occasions of homelessness within the last three years where the occasions add up to 12 months or more.
- Leaver a person who exits the program and is not active on the last day of the operating year
- Stayer a person who is still enrolled in the program on the last day of the operating year

APR/CAPER Reports Key Terms

- Adult a person age 18 or older
- **Child** a person under the age of 18
- Youth a person between the ages of 12 and 24 who is NOT in a household with anyone older than 24
- Household without children a household composed of only adults
- Household with children and adults a household composed of at least one adult and one child
- Household with only children a household composed of only children
- Unknown household type—a household that cannot be classified in cases when one or more persons are missing dates of birth. However, when the households already have at least one known adult and one known child, the household type will becategorized as a Household with Children and Adults.

APR Reports Key Terms

- Adult a person age 18 or older
- Child a person under the age of 18
- Youth a person between the ages of 12 and 24 who is NOT in a household with anyone older than 24
- Household without children a household composed of only adults
- Household with children and adults a household composed of at least one adult and one child
- Household with only children a household composed of only children
- Unknown household type—a household that cannot be classified in cases when one or more persons are missing dates of birth. However, when the households already have at least one known adult and one known child, the household type will becategorized as a Household with Children and Adults.

Stella P vs. System Performance Measures

LSA and System Performance Measure (SPM) reports use different logic:

- LSA universe is households, SPM universe is people served
- Both report time homeless prior to report period: LSA allows for 7 day gap, SPM does not
- LSA looks at returns for by household, it will not count returns by people who were in the original household but now are in a different household. The SPMs look at returns by person, as a result they count all returns.

Thank you for attending!
